

SILVERCARE ASSISTED LIVING SERVICES - Effective August 1, 2021

Monthly care service fees for Dementia Care are based on the resident's score from the Care Level Evaluation tool. A licensed nurse determines the resident's level of care by assigning point values to the individual resident's needs, including symptom management. Level of Care evaluations are initially completed when determining the monthly costs prior to move in. Re-evaluations will be done as needed when there is a change in status.
